

**AMENDMENTS TO THE SPECIFICATION**

Please add the following new paragraph after the paragraph ending on line 7 of page 32 and before the paragraph beginning on line 9 of page 32:

-- Embodiments of the invention may be implemented using a computer-usuable medium. Specifically, a computer-usuable medium may have computer-readable program code embodied therein for causing a computer system to perform the one or more of the embodiments discussed above for controlling access to resources. --
